

## **April 29, 2017 park walk-through**

**Present: Tom Roberts, Cathy Maruca, Kelly Majczyk, Brenda Tombaugh, Tammy Benovic and Jim Van Dyne**

### **Boat Ramp--**

**The recreation board found the beach particularly clean and the only issue was a tire left near the Waste Management Tote but Jim Van Dyne suggested that this may have washed up onto the beach and someone brought it up to the trash can.**

### **Lake Cliff Park--**

**It was noted that on the oldest remaining pieces of equipment, there remains a damaged tunnel which is about six feet off the ground that was slated for replacement three years ago and there was supposed to be a replacement section in storage at the township garage. Someone said that it turned out that the section did not fit. As the piece is dangerous, it is to be removed. Phone numbers on the label on the equipment were noted with the hopes of tracking down replacement parts. "Play World Systems 1-800-233-8484 and RPI004500796".**

**It was also noted that the mulch which was used as a cushioning material around the equipment is in need of replacement. Board members noted that all picnic tables are intact and present and still chained to the facilities. There is little graffiti this year.**

### **Napier Park—**

**Discussion on delayed remodeling of Napier Park – money was used in Teker Park improvements and new grants planned.**

**A slide on one piece of the equipment was broken and dangerous; this was noted for removal if a replacement could not be located. On the orange "spider" piece, several bolts had worked loose and need tightening. On the piece dubbed "The Circus Tent" some bolts were missing. Tammy Benovic said that the picnic tables need freshening-up.**

**Recreation Board ended the tour after the review of Curtis Park.**
